### **Methodology**

The analysis in this report is based on results of a survey conducted on August 29th, 2021 among a sample of 322 adults, 18 years of age or older, living in the federal electoral district of Shefford. The survey was conducted using automated telephone interviews (Smart IVR) and online samples. In the case

of telephone interviews, respondents were interviewed on landlines and cellular phones. The survey is intended to represent the voting population in Shefford.

As this survey used non-probability sampling to collect this sample, a margin of error cannot be applied to this sample. However, the margin of error for a probability sample of this size would be +/- 5.5% at the 95% confidence level. Margins of error are higher in each subsample.

Totals may not add up 100% due to rounding.
